Ethylene Generator and Ethylene Concentrate

Ethylene Generator is an instrument that is used for speeding up the ripening of stored fruits and vegetables, particularly banana, citrus and tomatoes. Unlike the usage of gas cylinders which is the old method for ripening, it has no risk for explosion. Its usage is very simple; no need for transportation and exchanging. Ethylene Concentrate, which is produced specially for Ethylene Generator by inkatech, is also a product you can use easily and safely in ripening.

General Features:

- Easier and safer usage than gas cylinders' (old method).
- Ethylene is generally recognized as safe by FDA.
- Safer than gas cylinders.
- No risk for explosion.
- Both of generator and developing liquid can be easily found to be bought.
- Usage is very simple. It is enough to turn the switch on to run.
- It is portable.
- No need to be exchanged and deposited.
- Not harmful to human health.
- Not toxic.
- Warranty period is limited to 1 year. All the maintenance and technical service are provided by inkatech.
